Post-Modern Profiles of the Serial-Murder of Nations will be Placed within the Comparative Context of the Big Lie(s) Behind How The Second World War Ended – As Well As How World War II Was Started – And Which Criminals Were Responsible!

The very idea of a Millennial Victory in the Pacific followed so immediately by the Calumny of Defeat in Korea and Retreat from Viêt-Nam is patently absurd on the face of it – yet an American Electorate wearied by almost Half-a-Decade of Legally Declared Proactive Conflict in The Second World War (1937—1945) was understandably willing to Accept whatever Rationalé its Corrupt Military/Science/Industrial-Complex Fronted (No Matter how Unbelievable) – If Only for the Sake of seeing Millions of their Sons Return Home from Overseas without the sufferance of any further pointless deaths in the largest Demobilization in the History of Mankind.

American Battle-Deaths throughout both European and Asiatic Theaters-of-Conflict Combined in the Totality of Global War To-Point of Pacific Cease-Fire in 1945 numbered (as Officially Admitted) approximately: 292, 000 Fatalities (K.I.A. [Killed-In-Action]) and 671, 000 Casualties (Permanently Wounded in Body/Mind). In 1947(!): On Speaking To the Intended Allied Invasion of Japan, Former U.S. Secretary of War Henry Lewis Stimson (b.1867—d.1950) wrote that he: "— ... was informed that such operations ... expected to cost over a million casualties to American forces alone." Six Years Later (In 1953): Upon the Death of Communist Dictator Ijosip (Joseph) Stalin (b.1879—d.1953) and the Consequent Close of Proactive Korean War Hostilities in the Ignominy of a Cease-Fire Still Extant Today On Part of the United Nations and Communist North Korea; The Former British Prime Minister, Sir Winston Leonard Spencer Churchill (b.1874—d.1965) asserted that: "— ... to quell the Japanese resistance man by man and conquer the country yard by yard ... well require the loss of a million American lives... (Churchill didn't dare upset his Countrymen any further by Factoring-In the inevitable Imperial British Fatalities in such an Operation)."

The I.J.A. (Imperial Japanese Army) was the largest Organization in Japan. By 1945: Over 10% of the Adult Japanese Population was either in an I.J. Army Uniform or on I.J. Army Payroll for Civilian

Workers. Over 90% of the I.J.A. was Actively Advancing On-Offensive in China At Time of the Americans Going Nuclear.

ON THE VERY DAY OF THE HIROSHIMA BOMBING (August 6th, 1945), a special War Department analysis of the new Japanese divisions being mobilized reached U.S. Army Chief of Staff George Catlett Marshall (b.1880—d.1959). It revealed that from 1937—1943, the Imperial Japanese Army had mobilized an average of eight (8) Divisions a year. But in 1944 alone, thirty (30) were formed to secure the Chinese mainland. And in the first seven (7) months of 1945, at least forty-two (42) had now been activated, twenty-three (23) inside Japan itself. And Japan had the Available Manpower to generate even more: As many as sixty-five (65) Infantry and Five (5) Armoured Divisions By-Time of Scheduled American Invasion – Japan Had Only Just Begun To Fight; this monumental Mass-Mobilization being the very reason why so few – if any – Able-Bodied Japanese Men were to perish via "Strategic" Bombing (either Conventional or Nuclear).

All of the Above Factored into the Allied Decision to Beg (there is no other appropriate term) the Soviet Union to Initiate the Allied Invasion of Japan (a Decision Formulated at the Highest Level[s] of American Command which – In and of Itself – Rendered America's Nuclear Terrorism just that; an Act of Terror and Nothing More, Strategically meaningless In Face of United States-Encouraged Communist Objectives) Long Before the Planned Anglo-American Landings on the Japanese Home Islands farther South. The Communist Invasion of Northern Japan Climaxed Disastrously for the Soviets in The Battle of Shimushu on August 18th of 1945 (the Last Major Battle of World War II) – Four Days (4 Dys.) After the American Leadership had Already Propagandized to its Populace that the Japanese had Unconditionally Surrendered on August 15th!

The I.J.N. (Imperial Japanese Navy) Deployment of Type-2 Ka-Mi Amphibious-Tank Units (Never Before Deployed in The Pacific Theater of War, but Maintained in Reserve for just this Contingency) Devastated Soviet Transports – literally blowing them "Out of the Water" and Defeating Stalin's Dreams of Occupying Hokkaido and Initiating Invasion of the Japanese Main Island of Honshu. By Time of The Battle of Shimushu, the Americans watched in horror as Japanese Forces Increased quickly in the Southernmost Main Island of Kyushyu, far exceeding General Marshall's Estimate of 350, 000 Men (Four [4] Divisions) to a Total of 625, 000 Men (Fourteen [14] Field Divisions). American Military Observers Invited to Witness the Japanese Slaughter of the Soviets on Shimushu – without even the need to Resort to Kamikaze Tactics and Bänzaï' Charges – Validated Richard Frank's Assertion that: "... the Japanese buildup on Kyushyu was sufficient to make the cost of invasion unacceptable."...

Only Once the Post-Modern American Electorate Comes to Terms with the Fact that the United States Military Hasn't Won a Single War Since The Genocide of The Philippine-American War of Filipino Independence (1899—1902 [The First World War of 1914—1918 was Ended, Not by Allied Invasion of Imperial Germany, but by The Spanish Influenza – which Killed Off 100 Million People Worldwide Within 18 Months and Edged Out The Black Plague in Mortality Ratios]) can American Culture Enter Maturity and either Participate or Isolate itself as a Responsible Member Among the Community of Nations.

The Ultimate Failure of the Allied War-Effort
– The Objective (and Unrealized) Post-War Division of Japan by the Allied Powers.
